

IN THE SPECIFICATION:

Please replace the paragraph on page 8, lines 22-24 of the present specification with the following paragraph:

The battery mounting 100 also has logic means 144 ~~142~~ in the form of a printed circuit card 144 containing an electronically stored VPD (vital product data) for managing the logic data of the battery cells 102.

Please also replace the paragraph on page 9, lines 4-7 of the present specification with the following paragraph:

The logic means 144 ~~142~~ has logic contacts 146 on the battery mounting 100 which are sprung pogo contacts which correspond to contacts on the board 101. The logic contacts 146 on the battery mounting 100 are loaded to the required position by the operation of the clip 116 and the screw or clamp means 130.
